Update on Proposed Less-than-CPI Fare Increase for 2026

6 400

Title VI/Environmental Justice/Limited English Proficiency Advisory Committee December 12, 2024

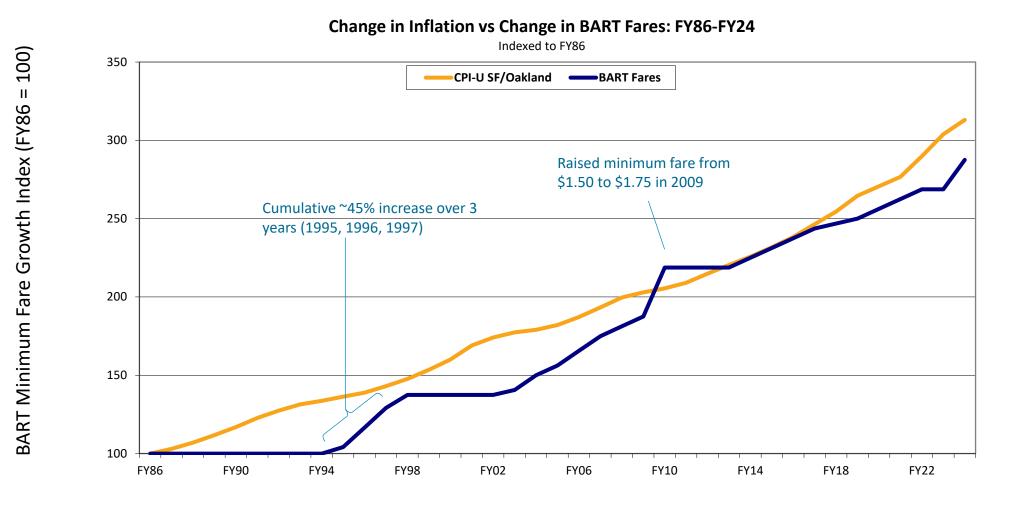

Agenda

- 1. Update on Proposed Less-than-CPI Fare Increase for 2026
- 2. Title VI Analysis and Report Process
- 3. Discussion and Questions

What is the Productivity-Adjusted Inflation-Based Fare Increase Program?

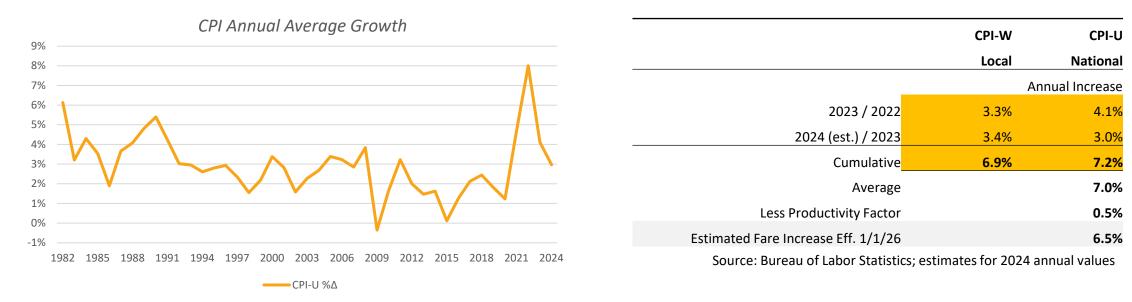

- CPI-based fare increase policy adjusts fares every other year by inflation less 0.5%
- Inflation is defined as the average of CPI-U (national) and CPI-W (local)
- Last approved increase: January 2024 & January 2025 (5.5% each)
 - Board approved two smaller increases due to anomalously high 11.4% inflation
- Next increase pending approval scheduled for **January 2026**; final increase in Series 3
- For nearly 20 years, CPI-based fare policy has allowed fares to keep up with the cost of providing reliable and safe service
- Allows for stable fare adjustments as required by the District's 2003 Financial Stability Policy
- Keeping fares in line with inflation is critical for restoring District financial sustainability

BART Minimum Fares vs. Inflation

Inflation, 2022 to 2024

- During the period assessed for this increase (Jan 2022 to Dec 2024),
 - Cumulative average inflation through October was 6.76%
 - Estimated annual average is 7.04%
 - Final input values will be published by BLS in January 2025
- The resulting fare increase for January 2026 is estimated to be 6.5%
 - Higher scenario 7%
 - \circ Lower scenario 6%
