

# SAN FRANCISCO BAY AREA RAPID TRANSIT DISTRICT

---

## MEMORANDUM

**TO:** Board of Directors

**DATE:** June 20, 2025

**FROM:** General Manager

**SUBJECT:** BART 2024 Annual Report: Sustainability

At the June 26, 2025 BART Board meeting, staff will provide an information item as a preview of the BART Annual Report for Sustainability for calendar year 2024 (CY 2024). In April 2017, the BART Board adopted a revised Sustainability Policy. In support of the Policy, the District released a Sustainability Action Plan (SAP) in December 2017. The SAP is a 10-year plan that identifies sustainability goals and actions to be taken throughout the District and performance measures to evaluate the achievement of those goals.

In the next few weeks, BART will publish the 2024 Annual Report: Sustainability, which summarizes BART's implementation of the Sustainability Action Plan through CY 2024. The report has been prepared with input from experts in numerous BART departments. It contains a collection of case studies from CY 2024 that highlight BART's achievements in sustainability and a summary of BART's sustainability performance metrics.

Changes in service made in CY 2023 contributed to a reduction in both total energy use and greenhouse gas emissions in CY 2024. When normalizing this data by Vehicle Revenue Miles, the metrics trend unfavorably, yet staff are committed to reducing total resource use. A new Sustainability Action Plan is under development that spans from 2026 to 2035 that outlines the actions necessary to do so.

If you have questions, please contact Val Menotti ([VMenott@bart.gov](mailto:VMenott@bart.gov)), Assistant General Manager, Planning & Development.
