

#### **Fare Coordination and Integration Study Update and Preliminary Recommendations** BART Board of Directors October 14, 2021

Appendix A – Business Case Inputs and Summary Metrics

Appendix B – Business Case: Available for download here.

## 1 — Fare Coordination & Integration Study Recap

# **Transit Operators & MTC Working Together**

**Fare Integration Task Force – Project Ownership** 

**Co-Project Managers – BART & MTC staff** 

**Transit Operator Staff Working Group** 

**Consultant team led by the firm Steer** 

**Policymaker and Stakeholder Engagement** 

**Policymaker Webinar** 

**MTC Policy Advisory Council Subcommittee on Fare Coordination/Integration** 

**Blue Ribbon Transit Recovery Task Force** 

### **Fare Integration Task Force**

## **Overview of Current Transit Fares and Products**

Local Bus/LRT Fare									
(Adult Clipper Fare)	\$1.50	\$1.60	\$1.75	\$1.80	\$2.00	\$2.05	\$2.25	\$2.50	
* = Higher fare for express/regional bus services	Petaluma Transit	Napa Vine*	FAST*	Golden Gate Transit*	CCCTA*	SamTrans*	AC Transit*	SFMTA	
	Sonoma County		WestCAT*		SolTrans*			VTA*	
	Transit			Marin					
				Transit	Tri Delta Transit	*			
	Vacaville								
	City Coach				Union City Trans	sit			
	Santa Rosa				LAVTA				
	City Bus

BART

## **Project Problem Statement**

Fare policy is one among several factors that have constrained the growth of transit ridership in recent years. Current fare policies are informed by funding and governance models that **incentivize locally-focused fares** without providing a coherent set of policies to set fares that support ridership growth.

As a result, Fare Coordination and Integration has a role to play in restoring transit ridership, supporting recovery from the COVID-19 pandemic, and **delivering the transportation system the Bay Area needs** for its coming decades of growth.

The following key issues define how fares impact ridership and contribute to the key challenges which detract from rider experience:

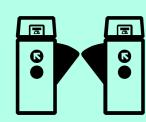

#### **Customer Value**

trip.

Equity

Current fare policies can lead to a disconnect between the fare charged and the value a customer places on their

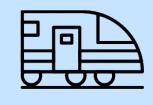

#### Payment Experience

Current fare products, passes, payment technologies, and payment experiences may not be legible.

Key Issues

Current fares may not consistently meet the needs of Equity Priority Communities.

Current fares may not optimize the ridership and benefits of proposed transportation investments.

#### **Future Transit**

**M** 

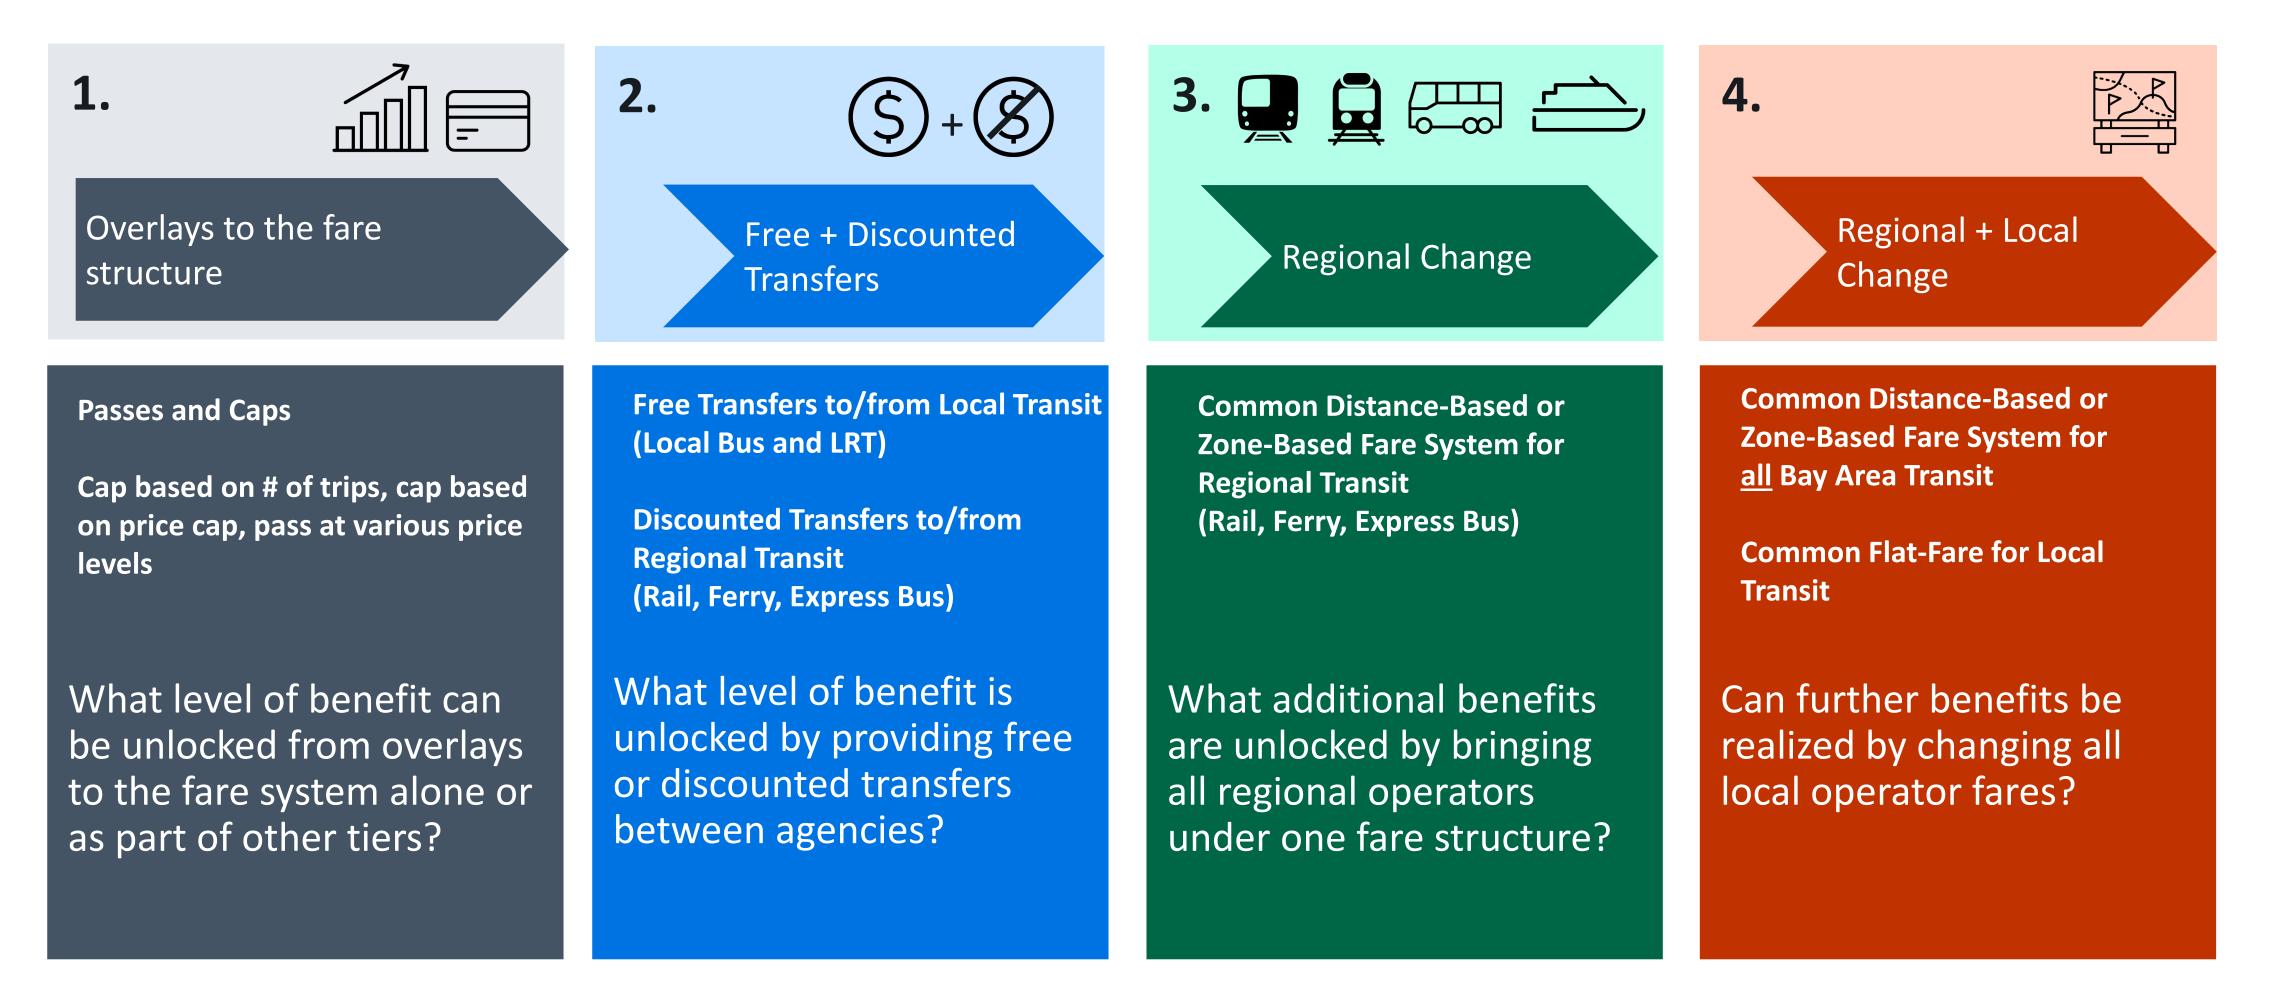

## **Fare Integration Tiers**

The fare integration business case assesses the benefits, costs, and requirements associated with increasing tiers of fare policy integration in the Bay Area.

- 3 - 4

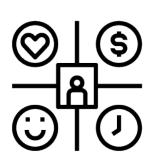

## **How Were Options Evaluated?**

A business case framework is being used to make recommendations based on:

The overall benefits of integration

The comparative benefits of each tier

For tiers with multiple options, the specific benefits of each option and best option within a tier

#### Evaluation to determine the value and benefit of a fare structure

### **Strategic Dimension**

Why pursue fare integration?

- Advance key regional policies and goals
- Higher ridership, equity, financial sustainability, customer experience, and change in VMT

#### **Socio-Economic Benefit** Cost Dimension

What is the value of fare integration?

> Monetizing the strategic benefits to estimate their overall value to the Bay Area

Reviewing financial impacts and risks and potential funding strategies

What are the financial requirements for successful integration?

Fare Structure Organization

Reviewing financial impacts, risks and funding strategies

How can fare integration be implemented and managed?

Delivery and Operation Dimension

Evaluation to determine the risks and requirements required to deliver a structure

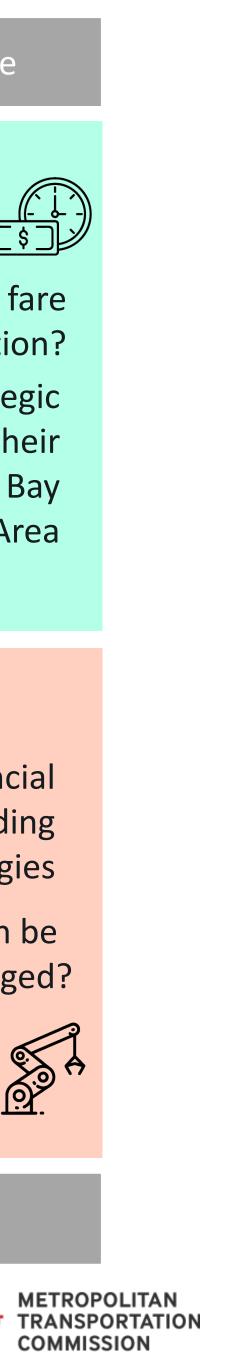

## **Overview of Key Findings**

### Are there fare integration options that offer a cost effective, equitable way to promote transit? **Yes**, especially in coordination with a broader user-focused regional strategy.

	Potential to drive ridership	Modeling suggests t transit ridership (2-6		
0 (\$) 0	<b>Cost-effective</b>	Ridership benefits o efficient (~\$2-3 per discounts (\$3/trip) o		
	Positive social ROI	Analysis suggests inv on investment throu		
	<b>Balanced equity impacts</b>	Fare integration stra indicates equity prio benefits of most stra		
	High uncertainty	There is uncertainty modeling as well as		

that fare structure changes could drive a small increase in 6%, depending on the strategy & revenue recovery level)

of targeted integration strategies appear reasonably cost new trip) as compared to alternatives such as global fare or service enhancement and system optimization (~\$3-15/trip)

ivestment in fare integration would have a positive social return ugh benefits such as lower VMT and travel time savings

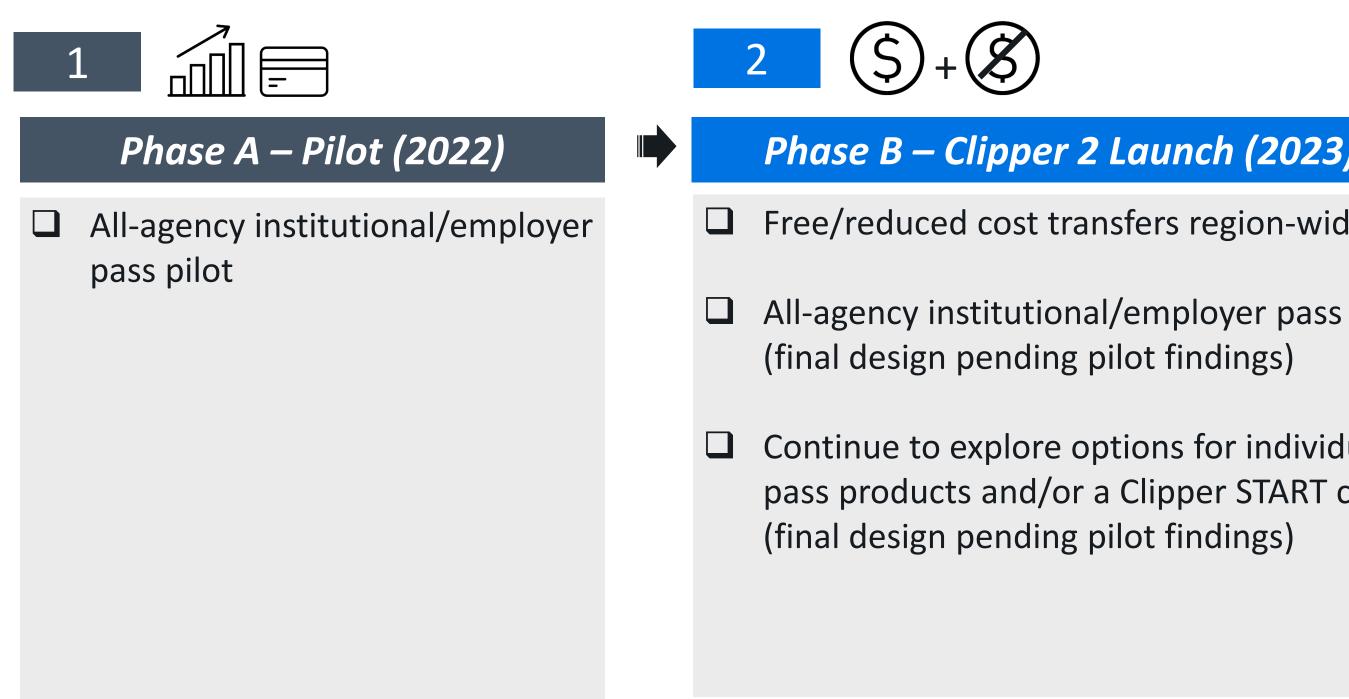

ategies appear compatible with regional equity goals. Analysis ority communities would receive a proportional share of the rategies

y in the findings due to both the inherent uncertainty of post-pandemic uncertainty

#### **Notes Regarding Local Authority**

- Recommendations do not contemplate transfer of locally-sourced funds between agencies
- Recommendations assume new regional funds would be sought to offset agency revenue impacts
- Phase A and Phase B recommendations do not contemplate changes to any agency board's fare-setting authority

#### Phase B – Clipper 2 Launch (2023)

- Free/reduced cost transfers region-wide
- Continue to explore options for individual pass products and/or a Clipper START cap

#### 3

#### Phase C – Post Clipper 2 (2024+)

- Continue to assess benefits and costs of a single distance- or zonebased fare structure for regional services
  - Continued study of this option *in the context of broader* evaluation of post-COVID ridership, role in the region, and funding strategy for regional services

### Implement no-cost and reduced cost transfers beginning in 2023

Free and reduced-cost inter-agency transfers region-wide

#### Definition

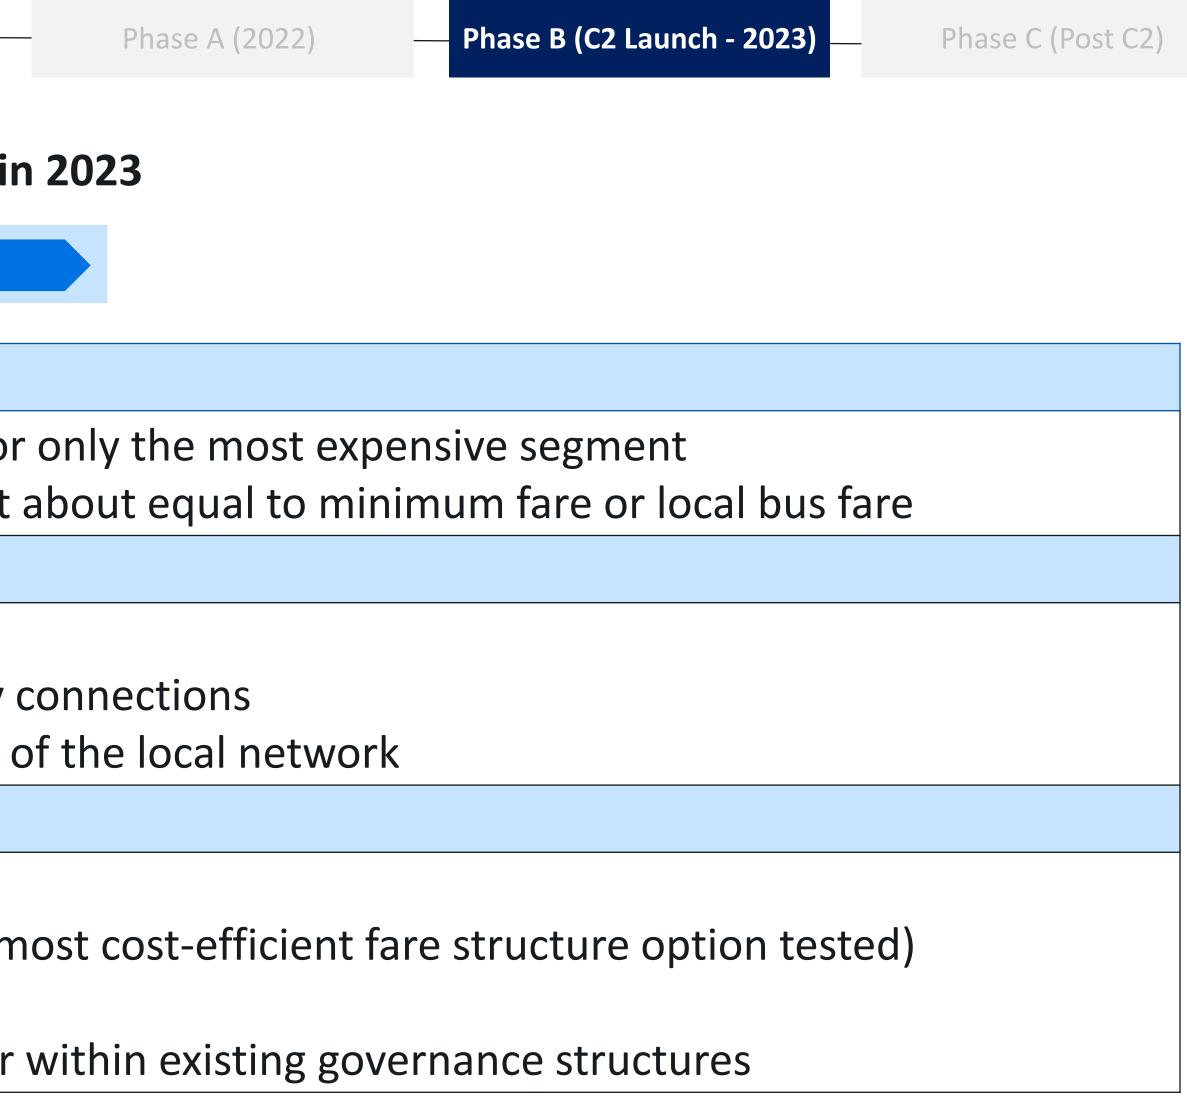

- Local/Local or Local/Regional connections: pay for only the most expensive segment
- Regional/Regional connections: Transfer discount about equal to minimum fare or local bus fare

#### Rationale

- Eliminate price barriers between agencies
- Treat inter-agency connections like single-agency connections
- Allow regional services to function better as part of the local network

#### **Business case summary**

- Ridership: 25,500 trips per day (+1.9%)
- Subsidy required: \$22.5M/year, \$2.25/new trip (most cost-efficient fare structure option tested)
- Equity: Benefits balanced across income levels
- Readily implementable in next generation Clipper within existing governance structures

### Pilot an all-agency employer/institutional pass beginning in 2022

**Employer/Institutional Pass** 

### Definition

- All agency / all-you-can-ride passes that institutions or employers buy for all constituents (comparable to Caltrain Go Pass, AC Transit Easy Pass, Puget Sound Orca Business Passport)
- Pricing likely based on business location for a long-term program, but simplified or subsidized for Pilot

#### Rationale

- Evaluate a barrier-free all agency transit pass to build toward broader fare integration in 2023 Engage Bay Area institutions and business community in transit's success
- Promote commute market recovery

#### **Business case summary**

- Priced to achieve subsidy parity with other fares (~\$0/new trip)
- Equity: Requires careful design/mitigation to achieve equity balance
- Modeled on successful programs in the Bay Area and in peer regions
- Can be piloted in existing Clipper system

### Consider implementing an individual pass in 2023 or later (pending pilot outcomes and funding)

Individual Pass ("Puget Pass" model)

### Definition

- trip would require \$1 of payment from e-cash)

#### Rationale

14

- Allows multi-agency users the same high-volume discounts now available to single-agency riders
- Reduces user friction for multi-agency trips
- volume rail/ferry riders not over-subsidized relative to local bus riders)

#### **Business case summary**

- Ridership: 21,900 trips per day (+1.5%), Subsidy required: \$34M/year, \$4.35/new trip
- structure

Multi-agency pass offered to individuals; price is based on user-selected fare multiplied by standard factor For example, a \$3.00 pass costs \$3 x 18 round trips per month (\$108). All trips up to \$3 are covered. (A \$4

Comparable to multi-agency pass offering in Seattle region ("Puget Pass") and the Washington, D.C. region

Multi-tiered structure aims to minimize revenue loss and improve equity performance (ensures highest-

Equity: Up-front payment may exclude low-income riders (consider pairing with Clipper START fare capping) Can be implemented in Clipper 2 but will require system changes; need multi-agency revenue sharing

### Continue to Evaluate Costs and Benefits of Standardizing Regional Fares Post Clipper 2 (2024+)

Single Fare Structure for Regional Service Definition Shared distance- or zone-based structure for all regional services (rail, ferry, regional express bus) Evaluate this option in the context of broader evaluation of post-COVID ridership, role in the region, and

funding strategy for regional services

#### Rationale

- A more learnable/legible system for regional travelers, infrequent users, and visitors
- Potential to be part of a broader customer facing strategy for long-term regional recovery

#### **Business case**

- Ridership & Fiscal Impact:
- Equity: Benefits balanced across income levels
- change management for some regional customers

High investment option: Ridership: 68,000 Trips/day (+4.7%); Subsidy required: \$70M/year; \$2.84/trip Lower investment option: Ridership: +2.1%, Subsidy required: \$26M/year, \$2.39/trip

Requires new agreements or governance structure for regional service, some new Clipper equipment,

### Tier 4 - No recommendation at this time

Single Fare Structure for Local & Regional Service Definition • Tier 4 options examined included: Local common flat fare + regional distance-based fare; Local common flat fare + regional Zone-based fare; Zone-based for all transit service; Rationale Tier 4 options have higher deliverability challenges & higher modeled cost per trip than targeted strategies User research was not conclusive on customer experience benefits of standardization **Business case summary** Ridership & Fiscal Impact: High investment options: Ridership: 3%-4%; Subsidy required: \$67 to \$73m; \$3.28 - \$4.26/trip Lower investment option: Ridership: 0% to 1.5%; Subsidy required: \$13M-\$30M; \$4.02-\$4.34/trip Equity: Mixed equity outcomes; some options include fare increases on equity priority population members in certain communities to achieve standardization Requires new agreements or governance structure for all service, new technology, change management for 16 most customers

## **Next Steps: Advance Regional Institutional/Employer Pass Pilot**

#### **Pilot Objectives**

- Evaluate a barrier-free all agency transit pass to build toward broader fare integration in 2023
- Collect data that could be used as the basis for revenue model for permanent program

#### Phase 1 (2022)

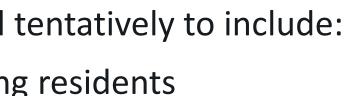

- Focus on colleges and universities
- Demonstration project with affordable housing residents
- Leverage existing agency relationships to establish program quickly

#### Phase 2

- To be designed and implemented based on learnings from Phase 1, and tentatively to include:
  - Expansion to include private employers and more affordable housing residents
  - Partner with business organizations and property managers

#### Challenges

- Similar offerings tend to serve either students or white-collar workers program will need a strong equity focus to achieve balance
- Significant administrative cost / staffing requirements
- Clipper 1 implementation requires 100% of agencies to sign-on
- Revenue risk pilot will require funding to backstop agency revenue

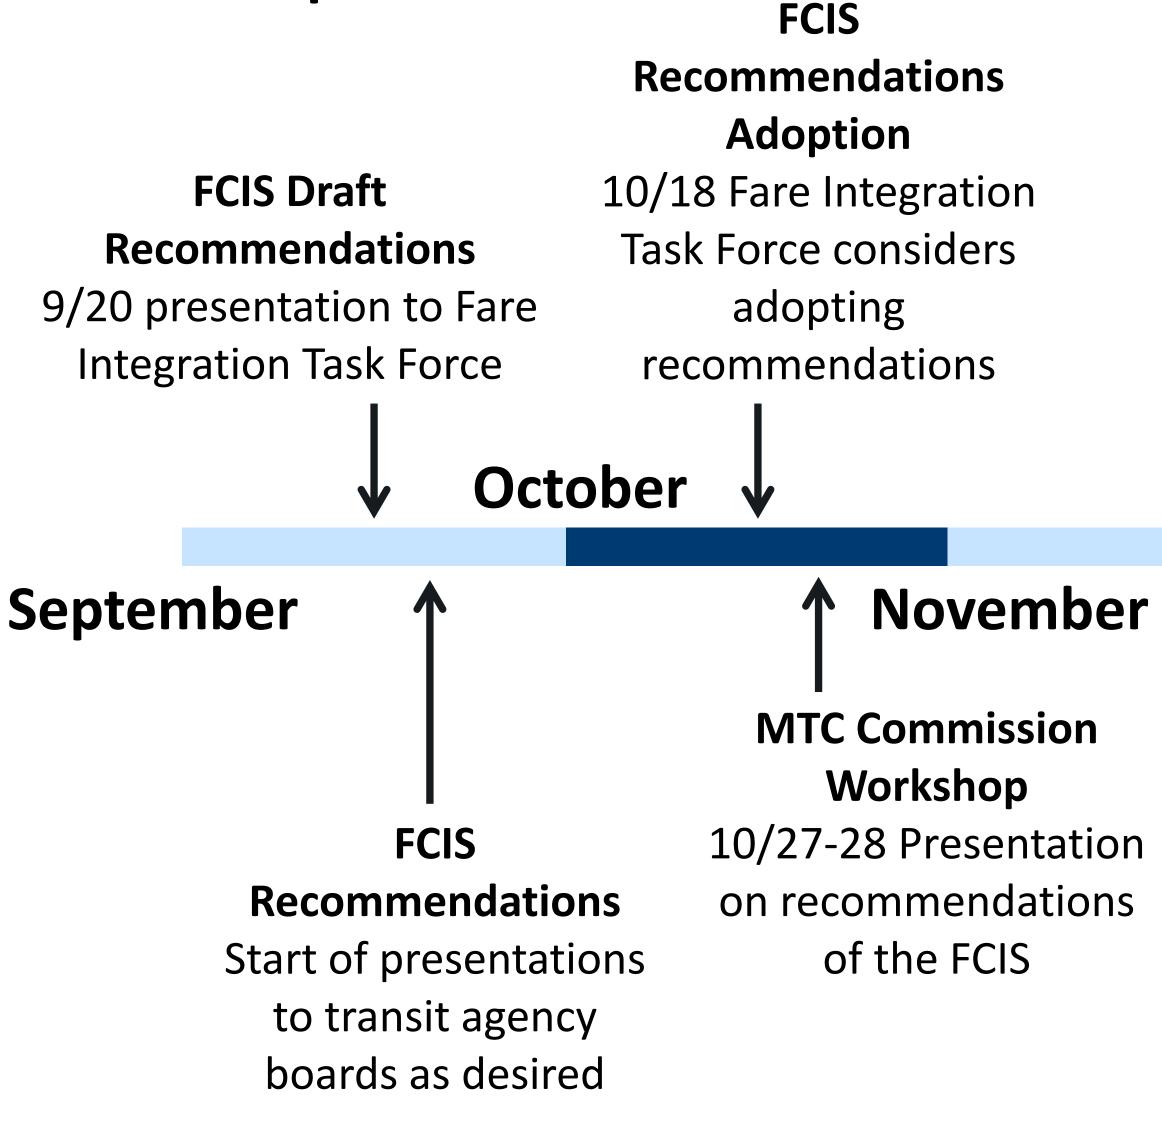

## **Next Steps**

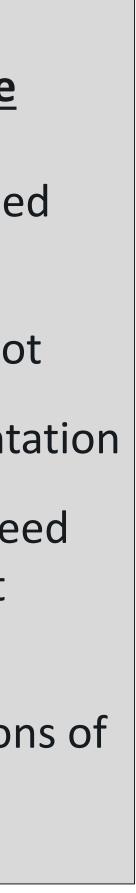

Delivery of FCIS Pilots, Demonstration Projects, and Longer Term Actions

### **Onwards** $\rightarrow$

### Key Actions for Fare Integration Task Force to Consider

- Decision on whether to proceed with a pilot
- Management structure for pilot
- Funding to support implementation
- Decisions on whether to proceed with Tier 2 (free/reduced cost transfers) in Clipper 2
- Forum for continued discussions of FCIS recommendations

## What is considered in a business case?

Used for understanding how
each tier or option could impact
ridership and revenue
and potential wider benefits
of structure change

Forecasting and Modelling

 Used to inform how different tiers or options should be assessed and solicit wider perspectives on fare structure change Stakeholder Engagement

•Used to inform how different tiers or options should be assessed and solicit wider perspectives on fare structure change

Agency Engagement  Used to inform how different tiers or options
should be assessed and confirm key strategic, financial,
and implementation considerations

## Fare Integration Analysis: Structural Change and Revenue Impacts

The FCIS reviewed a range of changes for fares in the Bay Area these can be divided into structural changes and revenue impacts

#### Structural Changes

Structural changes include changes to:

- Local services the amount charged for fares on local bus and LRT services
- Regional services the amount charged for trips on rail, ferry, and express bus
- Transfers removing or discounting additional fares paid when using multiple operators

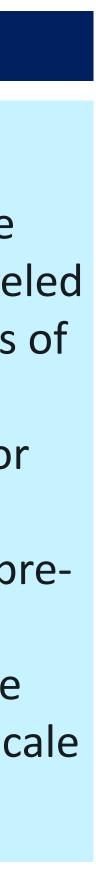

#### Revenue Impacts ("Subsidy")

Each structural change can either increase or decrease revenue generated. Without fare increases and/or ridership increases, fare integration will require additional investment. Each Tier was modeled based on the following "subsidy" changes to illustrate the impacts of structural change and subsidy change:

Low Investment – approx. cost of free/reduced cost transfers or 1% to 2.5% of pre-COVID revenue

High Investment – approx. Tier 3 integration or 5% to 7.5% of pre-COVID revenue. Tiers 3-4, which may increase fares for some customers, were tested with additional investment to minimize any fare increases and to understand how the policy impacts scale with level of investment

## **Summary of Key Business Case Metrics**

Ti	er Fare Integration Scenario	Ridership change (%)	Revenue Impact / Subsidy required (%)	Revenue Impact / Subsidy required (\$M)	Cost per new rider	
	Transfer Discounts 🛞 + 🇭					
	No-cost transfers (local/local, local/regional)	0.8%	1.2%	\$12	\$2.86	
2	No-cost transfers (local/local, local/regional, regional-regional)	1.9%	2.3%	\$23	\$2.25	Recommended
	Regional Standardization (higher investment) 🛛 🖳 🛱 📼 👄 or 🛛 😫					
(7)	Unified Fare by Distance for Regional Services only	4.7%	7.2%	\$70	\$2.84	Continue to evaluate
4	Unified Fare by Distance for Regional Services + Local Flat Fare	4.2%	7.5%	\$74	\$3.28	
	Small zones for all service	3.0%	6.9%	\$67	\$4.26	
	Large zones + local flat fare	3.8%	7.5%	\$73	\$3.69	
	Regional Standardization (lower investment) 🛛 🖳 🛱 📼 👄 or 🛛 😫					
(1)	Unified Fare by Distance for Regional Services only	2.1%	2.6%	\$26	\$2.39	
	Unified Fare by Distance for Regional Services + Local Flat Fare	1.1%	2.4%	\$23	\$4.02	
4	Small zones for all service	-0.2%	1.3%	\$13	No new riders	
	Large zones + local flat fare	1.5%	3.1%	\$30	\$4.34	
	Passes & Caps 📶 🖃					
	Fare-based cap (\$162 Dollars)	0.5%	6%	\$58	\$22.36	
1	Trip-based cap (40 trips)	0.7%	5%	\$49	\$13.31	
	Individual Pass ("Puget Pass" model)	1.5%	3.5%	\$34	\$4.35	Continue to evaluate
	Employer/Institutional Pass	Impacts of program based on scale of participation, intended to have no financial "subsidy" need.			두 Pilot	
	Global Discounts (for comparison)					
	2.5% Global Discount	0.9%	1.4%	\$14	\$3.24	
	5% Global Discount	1.75%	2.9%	\$29	\$3.06	

## **Summary of Key Business Case Metrics**

Tier	Fare Integration Scenario Transfer Discounts (\$)+	Overall Equity Assessment	Socio-Economic Benefit	Deliverability
2	No-cost transfers (local/local, local/regional)	Generally Positive	\$50	Low Impact
2	No-cost transfers (local/local, local/regional, regional-regional)	Generally Positive	\$120	Low Impact
	Regional Standardization (higher investment) 💂 🚊 🛲 👄 or 🛛 😫			
3	Unified Fare by Distance for Regional Services only	Mixed Performance	\$340	Mid/High Impact
	Unified Fare by Distance for Regional Services + Local Flat Fare	Mixed Performance	\$310	High Impact
4	Small zones for all service	Mixed Performance	\$70	High Impact
	Large zones + local flat fare	Mixed Performance	\$280	High Impact
	Regional Standardization (lower investment) 🛛 📮 🖽 👄 or 🖉			
3	Unified Fare by Distance for Regional Services only	Mixed Performance	\$110	Mid/High Impact
	Unified Fare by Distance for Regional Services + Local Flat Fare	Mixed Performance	\$50	High Impact
4	Small zones for all service	Mixed Performance	-\$170	High Impact
	Large zones + local flat fare	Mixed Performance	\$90	High Impact
	Passes & Caps 📶 🚍			
	Trip-based cap	Mixed Performance	NA	Low Impact
1	Fare-based cap	Requires Mitigation	NA	Low Impact
T	Individual Pass ("Puget Pass" model)	Requires Mitigation	NA	Low Impact
	Employer/Institutional Pass	Requires Mitigation	NA	Low Impact

Note – Tier 3 and 4 options were assigned a mixed performance score for equity as each option can decrease fares for some equity priority groups but raise fares for others. Further analysis, including full Title VI, is required to identify if mitigation is required.
